	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** - User can input their watching times - Program can calculate total watch time from said information - Program gives back total watch time at the end of each week	**Schedule - (For V2.0+)** - User can request statistics from a specific time period - Add a rating system - Report back what the user's most highly rated TV was
Not Important	**Delegate - (Use a Library)** - Give the user in the weekly summary the average # of hours watched each day - Give the user in the weekly summary the most watched in one day - User can switch up format of input and program can still read it	**Delete - (Cut Out)** - Branch out to movies as well - Have a database to pick TV shows from so the user doesn't have to manually input - Have a database of individual episode lengths
